Career Objective

Aspiring Software Engineer with strong foundations in OOP, Python, and full-stack development. Looking to join a growth-focused organization where I can build high-quality, efficient, and scalable applications while continuously enhancing my engineering skills.

Education

Sri Indu College of Engineering & Technology **Sep. 2021 – 2025**
B.Tech – Computer Science & Engineering (AIML) *CGPA: 7.55/10*

Sri Chaitanya Junior College **2019 – 2021**
Intermediate *Score: 920/1000*

The Legend High School **2019**
SSC *CGPA: 9.7/10*

Relevant Coursework

- Data Structures
- Database Management
- Python Programming
- HTML
- Django
- Object Oriented

Programming

Internships

Infosys Springboard **Jun. 2024 – Aug. 2024**
Python Stack Development Intern *Virtual (3 Months)*

- Built database-backed web applications using Python and Django, applying Agile development methodologies throughout the project lifecycle.
- Practiced modular programming and improved debugging skills by structuring code into reusable components.
- Collaborated with peers using Git and GitHub for version control, branching, and code reviews.

CodTech IT Solutions **Nov. 2024 – Dec. 2024**
AI Intern *Virtual (1 Month)*

- Developed a rule-based chatbot using predefined patterns and responses to handle user queries.
- Designed conversation flows and intent matching logic to improve response accuracy and user interaction.

Projects

ViSiOCR – Visitor Pass Generation | *Python, Django, Tesseract OCR* **2024**

- Developed an OCR-based automated visitor management system using Django & Tesseract, reducing manual entry time by ∼80%.
- Improved data accuracy for security verification through automated ID extraction and structured data storage.

YouTube Transcript Summarizer | *Python, Flask, Google Generative AI API* **2024**

- Built a Flask-based summarization application using Google Generative AI API to process video transcripts.
- Enabled users to convert long educational video content into concise summaries for faster learning.

Fake News Detection Using NLP | *Python, NLTK, Scikit-learn* **2023**

- Designed a logistic regression-based classifier with an NLTK text preprocessing pipeline for fake news identification.
- Achieved 95% classification accuracy on a standard benchmark dataset.

Technical Skills

Languages: Python, MySQL, HTML/CSS, JavaScript
Frameworks: Django, Flask
Developer Tools: VS Code, Git, GitHub
Concepts: SDLC, OOP
Soft Skills: Presentation, Email Writing, Communication, Time Management

Certifications

Infosys Springboard – Python Fundamentals

Coursera – AI for Everyone

Infosys Springboard – Database Management Systems (DBMS)

Great Learning – Data Structures in C
